(54) DIGITAL CAMERA

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a digital camera applicable to various purposes.

SOLUTION: At the time of LF-State=1 (using a display part and using a flash), after setting a live view mode 1 in a step S802, shutter priority is set in the step S803. At the time of LF-State=2 (using the display part and not using the flash), after setting the live view mode 2 in the step S804, white balance priority is set in the step S805. At the time of LF-State=3 (not using the display part and using the flash), since the display of an LCD display part 10 is in an OFF state, jumping to the step S803 is performed and only the shutter priority is set. Similarly, at the time of LF-State=4 (not using the display part and not using the flash), jumping to the step S805 is performed and only the white balance priority is set.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
